adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes according to michel foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being primarily informed

by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies it argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing jean baudrillard is the proliferation of risk this is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology francois ewald adsensory wearable technologies are called upon as a strategy of deterrence jean baudrillard to indemnify capitalism s production of signs which dissimulate their simulation in a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks based also on case studies of european court of justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision in so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism this gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of foucauldian panoptics and mathiesen synoptics adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantal technologies axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimulating the limits of financialisation are beginning to emerge

cognitive sciences have been involved under numerous accounts to explain how humans interact with technology as well as to design technological instruments tailored to human needs as technological advancements in fields like wearable and ubiquitous computing virtual reality robotics and artificial intelligence are presenting novel modalities for interacting with technology there are opportunities for deepening exploring and even rethinking the theoretical foundations of human technology use this volume entitled cognition and interaction from computers to smart objects and autonomous agents is a collection of articles on the impacts that novel 3 september frontiers in psychology 2019 cognition and interaction interactive

technologies are producing on individuals it puts together 17 works spanning from research on social cognition in human robot interaction to studies on neural changes triggered by internet use that tackle relevant technological and theoretical issues in human computer interaction encouraging us to rethink how we conceptualize technology its use and development the volume addresses fundamental issues at different levels the first part revolves around the biological impacts that technologies are producing on our bodies and brains the second part focuses on the psychological level exploring how our psychological characteristics may affect the way we use understand and perceive technology as well as how technology is changing our cognition the third part addresses relevant theoretical problems presenting reflections that aim to reframe how we conceptualize ourselves technology and interaction itself finally the last part of the volume pays attention to the factors involved in the design of technological artifacts providing suggestions on how we can develop novel technologies closer to human needs overall it appears that human computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape

this edited volume wearable technologies is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of computer engineering the book comprises single chapters authored by various researchers and edited by an expert active in the computer engineering research area all chapters are complete in themselves but united under a common research study topic this publication aims at providing a thorough overview of the latest research efforts

this multi disciplinary collection of essays captures discussion thinking and research surrounding the recent surge of interest in how technology can help us as we age a wide range of topics are covered from investigations in the use of technology to improve health and well being to examinations of digital gaming mobile health apps and the quantified self in relation to an ageing population from multi disciplinary perspectives this collection highlights the role of a more social approach to technology as such a variety of social research methods are used throughout the chapters the benefits and issues with different approaches are highlighted both in terms of further research but also so the reader can judge the value of the research for themselves this collection brings together the latest thinking and cutting edge contemporary research from leading thinkers and academics in the field of human computer interaction health and gerontology in taking a social approach it highlights how technological practices fit within wider gerontological political and cultural perspectives it therefore has

potential to influence those working in human computer interaction digital humanities sociology psychology and gerontology it can help change the practice of people working in the health and social care field in computer and product design and in the digital and creative industries

frontiers in medicine is delighted to present the reviews in 2023 series of research topics reviews in 2023 is a series being launched across frontiers in medicine s sections which aims to publish high quality review articles on key topics within the field the goal of this series is to highlight recent advances within the field whilst emphasizing important directions and new possibilities for future inquiries this research topic welcomes review mini review and systematic review articles on topics within pulmonary medicine new articles will be added to this collection as they are published please note that manuscripts consisting solely of bioinformatics or computational analyses of public genomic or transcriptomic databases and or in silico analysis of bibliometric trends will not be considered for this collection
