a medical dictionary originally published in England in 1854 revised and updated for American audiences

little attention has been paid to the history of the influence of the social sciences upon medical thinking and practice in the twentieth century the essays in this volume explore the consequences of the interaction between medicine and social science by evaluating its significance for the moral and arterial role of medicine in modern societies some of the essays examine the

ideas of both clinicians and social scientists who believed that highly technologized medicine could be made more humanistic by understanding the social relations of health and illness other authors interrogate the critical assault which social science has made upon medicine as a system of knowledge organisation and power the volume discusses therefore the relationship between social scientific knowledge both in and of medicine in the twentieth century collectively the essays illustrate that the respective power of biology and culture in determining human behaviour and social transition continues to be an unresolved paradox

this book focuses on the conventional and emerging applications of radiations which include radio waves and ultraviolet and gamma radiations it discusses new techniques in radiation therapy and the effects of ionizing radiations on biological systems the applications of radiations in the synthesis and use of nanoparticles along with the effects of hypergravity indicate a new trend the book offers a concise account of the latest studies carried out so far and shows the new initiatives to be undertaken in the field of medicine and biology it covers the medical use of radiations such as ferrous sulfate benzoic acid xylenol orange dosimetry co 60 tomotherapy radio electro chemotherapy and fractional radiotherapy and radiobiological effects such as the effects of cell phone radiations on human health parameters and the combined effects of radiations and hypergravity on plants
