the self publisher s bible in this clear and entertaining ten step guide now in its eighth edition a prolific american author tells how he formats his books using free software for upload to online bookstores the secret he explains is to use the universal epub format to create a single e book file that will be accepted by every digital retailer from

amazon.com through Barnes & Noble, the Apple iBookstore and smaller booksellers like the Canada-based Kobo. Most beginners write their books in Word or Open Office. NotJohn says and then they try to upload the same document for conversion to an e-book. Sometimes it works, more often it doesn't because these programs litter the file with hidden formatting. The result can be a disaster. Instead, the Word processing document should be converted to clean HTML, the markup language used to create a web page. All e-books are web pages at heart, and the Kindle and other e-book readers are just special-purpose web browsers. The conversion from document to HTML file takes seconds; it can then be plugged into a simple template that NotJohn includes in this guide and also makes available on his blog for anyone to use. He also supplies a style sheet to format the book for best appearance on the Kindle Fire tablet, the various Kindle apps as well as on competing tablets and e-book readers. If all else fails, there's Plan B: a stripped-down template for novels and for non-fiction that consists mostly of text. He concludes with a chapter on how best to present your e-book on the Kindle platform, with hints on encrypting the book, copyrighting it, and pricing it for the greatest return. And new this year: a chapter on adapting the e-book to a print edition with illustrations and screenshots. Revised and updated 2017 edition.
