bhagat singh is a name that became synonymous with revolution in india s struggle for independence this young boy brought about a change in the way people thought about freedom he was well read and fought extensively for rights his own his comrades and his countrymen s a discussion with a friend soon turned into a matter of self assessment for bhagat singh leading to a discourse on why he chose to be an atheist even in the face of death at a very young age his uncanny observation leads to his putting forth some pertinent questions on another occasion he was disappointed with his father s plea in court for his innocence and chose to write a letter to him this book is a collection of eighteen of his valued writings from within the walls of prison and outside it which show us the resolve in his words and the bravery in his acts subsequently

the author s journey of turning into an atheist

a guide to atheism and nonbelief shares counsel on the challenges of questioning the views of one s upbringing establishing beliefs about religion and spirituality and addressing the practical aspects of managing religious occasions

dear non believer i like that when the infuriating alarm clock yells wake up theres a challenge waiting for you today rousing you from a pleasant dream you do not smash it you simply slap the off button and head to work lets establish this your boss doesnt care how you view your alarm clock he or she only cares that you show up at work on time with a smile on your face saying scientists have figured it out there is no god and there is no need for one is common nowadays to counter christians muslims and jews who turn up saying wake up atheist theres a challenge waiting for you in the afterlife unfortunately that response can be illogical ask any scientist is the scientific community sure there is no creator and the likely answer will be no we are only about 99 sure anyone could be wrong as richard dawkins said the common response makes you a 1 gambler and frames you as defending personal conclusions instead of facts it makes sense to defend statements such as that dna decides biological characteristics such as eye and skin color and that chimps are our biological cousins because these are facts however defending the statement there is no creator after reading adams story has nothing to do with defending facts the only fact in the adam story is that if we have a creator he paid no attention to science while introducing himself to our ancestors instead he preferred to focus on teaching them how to overcome the challenges of life there are atheists who believe in science but do not use it as the base of their arguments they say we dont care when there is no evidence be careful using this kind of reasoning it is true that sometimes the problem is that there is no evidence but sometimes the problem is that there is no desire to see the evidence there is a story about a police officer who released a murderer despite having video of him committing the crime what was the officers

rationale for dismissing the evidence you might ask it was made by the victim maybe the difference is little between the police officer and atheists who label the books in which the abraham story and the mary story are written as man made rather than possible evidence or product of divine intervention the troubling situation if youll allow me to call it so is easy to solve do you remember what we established about your boss think about it the creator if he does exist should not be less understanding or less open minded than your boss so what if you view todays christians muslims and jews as infuriating alarm clocks what you should care about is leaving this world with a wide confident smile similar to the smile of a confident employee when he or she says good morning to their colleagues and boss i am aware that you dont deem books worth reading unless their titles are such as god is not great or god is so bad but i kindly ask you to make an exception i want to draw that confident smile on your face considering the ignorance of contemporary christians muslims and jews nothing should be easier than drawing that smile always remember that there is 1 probability that a creator does exist it is not good form for you to look disoriented if the creator says to you okay numb skull i appreciate your refusal to be a christian a muslim or a jew but tell me why did you think i was less understanding and open minded than your boss have i not made from an atheist a role model for you what more did you want from me also tell me why you have released me although i left in your hands books in which i admitted committing crimes against your kind

nastik chronicles the transformative journey of a modern indian sceptic who initially embraced western neo atheism it begins with the protagonist s disillusionment with religious dogma and his subsequent adoption of western neo atheism characterized by a staunch denial of theism and a critique of religion s influence on society as the narrative unfolds he encounters the rich tapestry of indian philosophy he discovers the nuanced perspectives of nastik schools of thought in indian tradition such as charvaka

this book contains my writings other apologetics writers top scientists thinkers and scholars on the topics of ontology evolutionary theory theology biogenesis quantum physics philosophy science physics scientism and epistemology pertaining to the core topic of refutations to atheistic materialism crucial to consider is the idea that it is not any one refutation or data point of evidence pointing to the plausibility of there being an eternal causal intelligence that creates a case for the strong possibility of such an eternal causal intelligence a creator rather it is the summation of all such robust data points and proofs that culminates in an over arching and inescapable conclusion that such a creator is not only highly plausible and therefore worthy of serious scientific philosophic and theological consideration but moreover to reject such a conclusion based upon the cumulative data is tantamount to an overt confession of scientific

malpractice and a glaring naturalism biases

in this book michael martin provides logical reasons for being an atheist carefully examining the current debate in anglo american analytic philosophy regarding god s existence martin presents a comprehensive critique of the arguments for the existence of god and a defense of arguments against the existence of god showing in detail their relevance to atheism claiming that atheism is a rational position while theistic beliefs are not he relies both on logic and evidence and confines his efforts to showing the irrationality of belief in a personal supreme being who is omniscient omnipotent perfect and the creator of heaven and earth the author s approach is two fold by presenting and criticizing arguments that have been advanced in favor of belief he makes a case for negative atheism by offering arguments against atheism and defending it from these attacks he presents a case for positive atheism along the way he confronts the views of numerous philosophers among them anselm aquinas planting a hick and swinburne and refutes both classical and contemporary arguments that have been advanced through the history of this debate in his conclusion martin considers what would and would not follow if his main arguments were widely accepted and he defines and distinguishes atheism from other isms and movements building on the work of religious skeptics and atheists of the past and present he justifies his reconstruction of this philosophical dispute by citing some of the most interesting and important arguments for atheism and criticisms of arguments for the existence of god that have appeared in recent journal articles and have yet to be systematically addressed author note michael martin is professor of philosophy at boston university and author of several books including the legal philosophy of h l a hart a critical appraisal and the case against christianity both from temple
