finding your way through the huge U.S. book trade community has never been easier. The comprehensive volume profiles nearly 30,000 retail and antiquarian book dealers plus 1,000 book and magazine wholesalers, distributors, and jobbers in all 50 states and U.S. territories. This useful tool will help you keep tabs on the entire bookselling industry from the smallest specialty bookstore to the largest chains. Locate wholesalers and jobbers for hard-to-find books, software, and audiocassettes. Track down foreign book dealers, importers, exporters, library collection appraisers, and specialty sidelines. Organized by state and city, entries include store or company size, specialties, years in business, owner, and key personnel contact information, including e-mail addresses and notations for those businesses that also handle audiocassettes, software, and other sidelines. You'll also find a types of stores index listed under bookselling categories, an index to wholesale remainder dealers, paperback distributors, exporters, and importers, and more.

A new account of the Mediterranean economy in the 10th to 12th centuries forcing readers to entirely rethink the underlying logic to medieval economic systems. Chris Wickham re-examines documentary and archaeological sources to give a detailed account of both individual economies and their relationships with each other. Chris Wickham offers a new account of the Mediterranean economy in the tenth to twelfth centuries based on a completely new look at the sources. Documentary and archaeological knowledge of the Mediterranean economy is based on syntheses which are between 50 and 150 years old. They are based on outdated assumptions and restricted data sets and were written before there was any usable archaeology. Wickham contends that they have to be properly rethought. This is the first book ever to give a fully detailed comparative account of the regions of the Mediterranean in this period: in their internal economies and in their relationships with each other. It focusses on Egypt, Tunisia, Sicily, the Byzantine Empire, Islamic Spain.

and portugal and north central italy and gives the first comprehensive account of the changing economies of each only byzantium has a good prior synthesis it aims to force our rethinking of how economies worked in the medieval mediterranean it also offers a rethinking of how we should understand the underlying logic of the medieval economy in general

the overthrow of viceroy joaquín de la pezueta on 29 january 1821 has not received much attention from historians who have viewed it as a simple military uprising yet in this careful study of the episode based on deep archival research patricia marks reveals it to be the culmination of decades of peruvian opposition to the bourbon reforms of the late eighteenth century especially the reglamento de comercio libre of 1778 it also marked a radical change in political culture brought about by the constitutional upheavals that followed napoleon s invasion of spain although pezueta s overthrow was organized and carried out by royalists among the merchants and the military it proved to be an important event in the development of the independence movement as well as a pivotal factor in the failure to establish a stable national state in post independence peru the golpe de estado may thereby be seen as an early manifestation of latin american praetorianism in which a sector of the civilian population unable to prevail politically and unwilling to compromise pressures army officers to act in order to save the state

mexico s post independence instability is usually seen as leading to economic stagnation as well as unproductive politics as this book shows commerce continued and expanded on the west coast but because of political difficulties much of the trade was conducted as contraband the very scale of the business belies the impression that mexico was in economic terms standing still on the west coast the availability of silver both for export and to pay for imports led to the organization of an expanding import export trade that persisted throughout the period here considered despite unpredictable economic policies and consistent political turbulence the region became

part of the expanding global economy of the first half of the nineteenth century and when circumstances permitted the entrepreneurs who organized the trade made tentative steps toward moving beyond commerce to manufacturing times were never easy but neither were they static
